REAL ESTATE

Q & A

What is your favorite thing about your community/town?

My favorite thing about the Richmond area is all of the great local restaurants. I love going out to eat, trying new foods and supporting small businesses. I also love the walking and hiking trails at Pocahontas State Park.

What initially drew you to real estate?

I love the freedom and the fact that every day is different. I get to meet new people and see different environments constantly, and I'm always learning.

How does your background bring a unique perspective to your work?

Coming from a marketing/communications background, as well as having experience in bookkeeping and finance, I understand all the different facets of the buying or selling process and the business, which helps me to empathize with my clients and advise them better.

Tell us about any non-profit or community organizations.

In my spare time, I run a small private cat rescue. We focus mainly on neutering and vaccinating community cats to stop the overpopulation of homeless kittens, but also step in when animal control is unable to help, such as in instances of injured cats or owners leaving their pets behind when moving. I am also active in my local church.
